PLACES TO VISIT IN THE AZORES BEFORE OR AFTER THE **EUROSUB UNDERWATER PHOTO**

Before the competition starts, the participants will arrive to Graciosa for training, one or two weeks before.

Family members or other people joining them, will probably intend to visit the Island of Graciosa or other parts of the Azores.

Likewise, the participants will intend to take advantage of the fact that are already in the Azores, to visit other spots after the competition.

Therefore, here-by Turangra presents information on the islands, as well as suggestions of activities that can be done, while staying in the Azores.

This information has no prices included, as tours should be assembled in an on request basis, and on conjunction with the airline flights to and from the Azores.

GRACIOSA

PLACES AND CLIMATE

In an oval shape, Graciosa surface is 61,66 km², 12,5 km long and 8,5 km wide. Not very hilly, flat and low in the North and Northeast, slowly rises up to the altitude of 398 m at Pico Timão. It is located at 28° 05' longitude west and 39° 05' latitude north. Of mild climate, it is the least humid island of the Archipelago. Gracefulness is a constant of the landscape and sights, which explains the name of the island - Graciosa. Its is equally called The White Island, due to its toponymics, Pedras Brancas, Serra Branca, Barro Branco. Places to visit: Furna do Enxofre, Monte de Nossa Senhora da Ajuda, Caldeirinha, Pico Timão, Termas do Carapacho, Ilhéu da Praia, Ilhéu da Baleia, the windmills, Vila de Santa Cruz.

SPORTS AND LEASURE

- Water Sports
- Scuba diving
- Fishing
- Snorkeling
- Hiking

SÃO MIGUEL

PLACES AND CLIMATE

S. Miguel, the biggest island of the Azorean archipelago is 746,76 km² surface. Its length, according to the axel, is 81 km and the maximum width is 15,5 km. The island's highest point is at Pico da Vara, at 1.103 m. It is situated between 25° 8' and 25° 52' longitude west and between 37° 43' and 37° 55' latitude north. The climate is mild, with temperatures raging between de 16° C (61° F) in the spring, 21° C (70° F) in the summer, 18° C (64° F) in the fall and 14° C (57° F) in the winter, which contributes to the exuberant vegetation, like hydrangeas, azaleas, etc as well as to the economic value and for the beautiful sights. São Miguel is known for the production of pineapple, tea and tobacco. Places to visit: Lagoas das Sete Cidades, Fogo and Furnas, Parque Terra Nostra, Caldeiras das Furnas, Tea Plantations, Pineapple Greenhouses, Caldeira Velha, Ilhéu de Vila Franca, Ponta Delgada, Ribeira Grande, Vila Franca do Campo, Pico do Carvão, Ribeira Quente, Nordeste.

SPORTS AND LEASURE

- Fishing
- Big Game Fishing
- Scuba Diving
- Snorkeling
- Water Sports
- Golf
- Nature Trails
- Horseback riding
- Extreme Sports

SANTA MARIA

PLACES AND CLIMATE

Included in the Oriental Group, Santa Maria is situated 55 miles south of S. Miguel. It is the most meridional island of the archipelago. With deep bays, the island of Santa Maria has 97,42 km² surface, with 17 km long and 9,5 km maximum width. After a flat hill, follows a rocky area where Pico Alto (590 m high) is and it is at 28° 08' longitude west and 37° 43' latitude north. The climate is mild, with medium temperatures which vary between 12° C (54° F) in the winter and 25° C (77° F) in the summer. Santa Maria is the only island of the Archipelago which the soil is of a sedimentar origin, where it is easy to find a great variety of fossils of molusculs and other bigger species. It has a variety of different sights, with a very hilly side at northwest, where the villages of Santa Bárbara and Santo Espírito are situated and of a plateau where the villages of Vila do Porto, Almagreira are, as well as the airport. Places to visit: Vila do Porto, Ermida de Nossa Senhora dos Anjos, Praia Formosa, Baía de São Lourenço, Furna das Pombas, Furna dos Anjos.

SPORTS AND LEASURE

- Water sports
- Scuba diving
- Fishing
- Snorkeling
- Hiking

TERCEIRA

PLACES AND CLIMATE

In an almost elliptic shape, Terceira island is 381,96 km² surface, with the maximum dimensions of 29 km long and 17,5 km wide. A flat hill, Serra do Cume, dominates the east side of the island. The central area is marked by a large and low crater of Caldeira de Guilherme Moniz and by the group of small hills of Serra do Labaçal, with its highest point in Pico Alto (808 m). To the west there is the mountain where the large crater of Serra de Santa Bárbara is, with an altitude of 1021m, the highest point on the island. Terceira Island is situated at 27° 12' longitude west and 38° 40' latitude north. The climate is nice and mild, with temperatures ranging from 11° C (52° F) in the winter and 26° C (79° F) in the summer. Places to visit: Angra do Heroísmo, Monte Brasil, Mata da Serreta, Serra de Santa Bárbara, Caldeira de Guilherme Moniz , Algar do Carvão , Serra do Cume , Ilhéu das Cabras , Miradouro do Facho, Biscoitos, Impérios do Espírito Santo.

SPORTS AND LEASURE

- Fishing
- Scuba diving
- Snorkeling
- Water sports
- Nature trails
- Horse back riding
- Golf

PLACES AND CLIMATE

Long shaped island with 56 km in length and only 8 km maximum width, S. Jorge has an area of 246,25 km². Created by several volcanic eruptions, all in a straight line, to which the craters are left, the central platform is 700 m medium height, with the highest point at 1.053 m. The sharp and almost vertical coast, mainly in the north side, is interrupted by small flat surfaces – the “fajãs”. It is situated at 28° 33’ longitude west and at 38° 24’ latitude north.

The climate, as on the rest of the islands of the Central group is moderate with annual medium temperatures between 12° C (53° F) and 25° C (77° F). S. Jorge is a long shaped island. Its coast has a combination of entrances and bays. Places to visit: Pico da Esperança, Fajãs, Ilhéu do Topo, Velas, Urzelina, Topo, Igreja de S. Jorge (Velas) and Igreja Santa Catarina (Calheta).

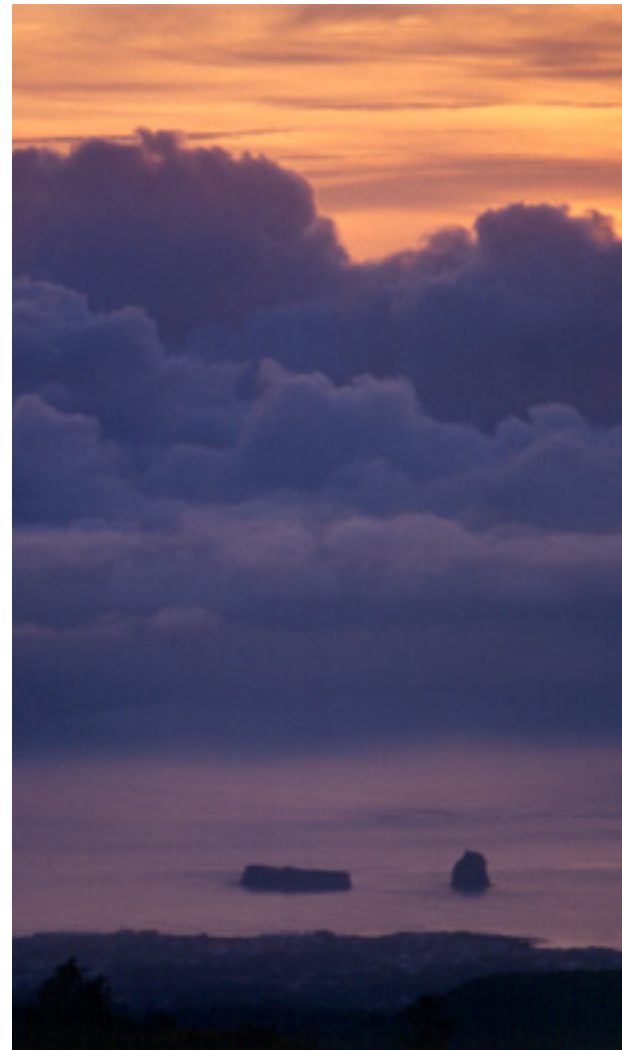

SPORTS AND LEASURE

- Scuba diving
- Fishing
- Snorkeling
- Water sports

SÃO JORGE

PICO

PLACES AND CLIMATE

Developing around the volcano which named it, with 2.351 meters high, the highest point of Portugal, the island of Pico has an oblong shape - 42 km long and 15,2 km wide - and the surface totals 447 km². A flat hill with secondary volcanic cones ends by the sea in high scarps while the lowest area, to the west, has moderate descents. It is situated at 28° 20' longitude west and 38° 30' latitude north. The climate is mild, with a moderate humidity average. Medium temperatures vary between 14° C (57° F) in the winter and 22° C (72° F) in the summer. Places to visit: Pico Mountain, Lajes, Museu dos Baleeiros, Criação Velha, Madalena, Capitão, Caiado e Paul, Arcos do Cachorro, S. Roque.

SPORTS AND LEASURE

- Whale and dolphin watching
- Scuba diving
- Fishing
- Snorkeling
- Water sports:
- Mountain climbing
- Hiking

PLACES AND CLIMATE

Shaped like an irregular pentagon, with an area of 173,42 km², the island of Faial is 21 km long and its maximum width is 14 km. Dominated by the volcanic cone of Caldeira, which extends in soft slopes interrupted by secondary volcanic formations, the island has its highest point at Cabeço Gordo, with 1.043 m. It is localized between 38° and 33' latitude and north and 28° and 38' longitude west. The climate is mild and soft, with weak thermal amplitudes, like in the rest of the islands. The highest temperatures are registered in August and the minimum in February. The medium temperatures per season are as follows: Spring 16° C (60° F), Summer 21°C (70° F), Fall 19° C (67° F) and Winter 14° C (58° F). Hills, the different shapes of the coast, curious islets, physical accidents caused by the volcanic activity, typical windmills and innumerable pasture fields, contribute to the great variety in the sights of the island of Faial. Places to visit: City of Horta, Horta Marina, Peter Café Sport, Porto Pim, Monte da Guia, Praia do Almojarife, Cedros, Ponta dos Capelinhos, Caldeira , Vale de Flamengos.
