- 3.7 There are six photo categories to compete in this Championship. Each competitor can only submit photos to four of these categories.
- 3.8 There are three video categories to compete at this Championship. Each competitor can only submit videos to two of these categories.
- 3.9 The submitted photos and videos will be judged by the jury.
- 3.10 **Photo and Video Categories:** Please refer to relevant articles of CMAS Underwater Photography and Videography).
- 3.11 The theme for the Photo with Theme Category is **Tube Worms - Canalipalpata** Better known as Tube Worms, Feather Worms, Fan head Worms. The Canalipalpata have no teeth or jaws. Most are filter feeders and very photogenic.
- 3.12 Team Captains can dive with their teams only on practice day.

4. PHOTOS

- 4.1 The procedures for the selection of photos are executed according to the CMAS Underwater Photography and Videography – General Rules Championships.
- 4.2 The Control Committee will control the images received in the TOP 15 in each category.
- 4.3 The theme category subject may not be permitted as the main part of the photo in any other category other than the “theme category” photo.
- 4.4 Double exposure and in-camera image overlay are allowed. The background or foreground image can only be used once in all photos. If the same background or foreground is used more than once, the photo submitted to the following category will be disqualified.
- 4.5 Cropping is allowed **only** in the “Creative Category”. Use of the FX or DX function of the cameras before taking the photo is allowed in all categories.
- 4.6 **Artificial Objects** – In this World Championship as a complement to the CMAS Underwater Photography and Videography – General Rules, participants are not allowed to submerge artificial objects underwater in five categories apart from the “Creative Category”. The Control Committee will disqualify those photos. However, artificial objects used to enrich the image's quality can be used but must not be seen in the photo, like color filters (can be used on lights and lenses), strobes mounted or remote, etc. The filter (color paper or else) can not be seen in the shot but its effect is accepted. A photo is not disqualified if a remote flash has been used and a part of the flash or its cable appears in the shot because the photographer was not able to hide it properly. It is understood as a condition of interpretation that it was not his intention that this element is a part of the shot.

In this case, the jury is free to give high points or not to this photo as they may think that the image is far from being a professional photo. The contest wants to show the natural environment and the beings that inhabit it at their best.

- 4.7 The participant has to make sure that he/she cancels the copyright function and any metadata of the camera so that the images sent to the jury can not recognize the image by the file names or metadata.
- 4.8 At the beginning and the end of both immersions, each day, the participants must take a "control photo" with the judge visible in the frame.

5. VIDEOS

- 5.1 The procedures for selecting videos are according to the CMAS Underwater Photography and Videography – General Rules Championships.
- 5.2 It is compulsory to record the infographics, video images (both under and above water), and photographs that will be used in the project during the days of competition. The participant will only be able to import into the project the following components that are not created during the editing time (free from copyright and previously registered by the organization).
- 5.3 At the beginning and the end of both immersions, the participants must film a "control take" with the judge visible in the video.
- 5.4 For the non-underwater takes (land takes), the participants can have unlimited time to film. It will be allowed during the training day and the days of the Championship. For non-underwater takes, it is not allowed to film in pools, swimming pools, or underwater of any kind. Memory card for the non-underwater takes will be different from the cards for the underwater takes. Mentioned cards will be formatted, the date on the camera will be changed and cards will be marked, and a control take will be arranged before the practice day.
- 5.5 The non-underwater takes (land takes) will be downloaded and verified by the organization in the editing room before being used and edited by the participants. The deadline for delivery to the organization of these takes will be during the first hour of the last day of editing.
- 5.6 The post-production can only be done at the designated area where the Organization Committee is announced and only by the videographer and assistant. Editing done by others will be punished by the disqualification of the team. Competitors must start their project with a clean slate, At the beginning of the post-production in the editing room the timeline of the projects of all the participants will be completely clean and empty.
- 5.7 The organization will designate an edit room where the participants will leave their post-production equipment from the first day of the Championship (practice day). This room will be open during the Championship days according to a timetable determined by the organization. It will remain locked for the rest of the time. Bringing or removing editing equipment, including laptops or storage units like external HD or memory cards, is strictly forbidden.
- 5.8 Competitors will work with their editing equipment; the lack of such equipment is not the responsibility of either CMAS or the Hosting Federation.

Artificial Objects – In this World Championship as a complement to the CMAS Underwater Photography and Videography – General Rules, participants are not allowed to submerge artificial objects underwater in two categories apart from the “Movie Category”. The Control Committee will disqualify those videos. However, artificial objects used to enrich the image's quality can be used but must not be seen in the video, like color filters (can be used on lights and lenses), strobes mounted or remote, etc. The filter (color paper or else) can not be seen in the shot but its effect is accepted. A video is not disqualified if a remote flash has been used and a part of the flash or its cable appears in the shot because the videographer was not able to hide it properly. It is understood as a condition of

interpretation that it was not his intention that this element is a part of the shot. In this case, the jury is free to give high points or not to this video as they may think that the image is far from being professional work. The contest wants to show the natural environment and the beings that inhabit it at their best.

6. PROCEDURES REGARDING MEMORY CARDS

- 6.1 The following procedures apply to the official training day and both competition days:
 - 6.2 Competitors ride together with their cameras in the hotel's designated place to go to the Marina
 - 6.3 In the designated area, under the direct supervision of a judge, they will:
 - Change date and time
 - Check that there is only one memory card in each camera
 - Format the cards
 - Seal the cameras
 - Take the first shot.
- After the camera housing is sealed, it can't be opened. It is not permitted to change the configuration, perform repairs, etc. without the direct supervision of a judge. The camera settings, batteries, and lenses are changed during the competition dives under the supervision of judges.
 - Athletes will take their cameras to their assigned boats when the organization committee instructs them.
 - Athletes must make a control image (photo or/and video) in the boat, immediately after leaving the water.
 - Should a lens or battery needs to be changed between dives or during the dive, this may only be done at a specially designated place, under the direct supervision of one of the judges, and without breaking the seal. If the camera needs to be opened to disassemble the lens or replace the battery, the seal can only be broken at this time. Should the seal need to be broken, this may only be done under the direct supervision of a judge. The judge reseals the camera housing with a new seal.
 - After the two dives of the day, the camera housing is opened in a specially designated place under the judge's direct supervision. The memory card is delivered to the judge.
 - Once back at the hotel, the organization will copy the files on the memory cards to the server. The memory cards are returned to the competitors (see the schedule of the program).

7. USE OF CAMERAS DURING THE CHAMPIONSHIP

- 7.1 Athletes can use more than one camera during the competition. All the cameras must be sealed, as described in article 6.
- 7.2 The Photographer or Videographer can only take **one** camera during the dive. If necessary, the competitor may change cameras during the competition time of ninety minutes. For that purpose, the team must come to the surface together and change the camera and return underwater.
- 7.3 The limit of photos taken each competition day is 300 photos. Photographers using more than one camera need to know that 300 photos are the **total** of all memory cards (control shots excluded) used in all the cameras. If more than 300 images are on the card/cards, the final images will be deleted.
- 7.4 It is not permitted to erase photos or/and videos at any time.

8. ADDITIONAL SANCTIONS

- 8.1.1 As a complement to the CMAS Underwater Photography and Videography several sanctions will be applied to certain infractions. These sanctions, like other attitudes and behaviors, will be evaluated by the Technical Delegate:
- 8.1.2 Not taking the control images before and after each dive: The correspondent dive images will not be accepted.
- 8.1.3 Not making the safety stop to avoid exceeding the ninety minutes of the dive: The photos of the dive are not accepted.
- 8.1.4 Breathing air of the dive buddy or the safety bottle on the boat's cable: The Immersion is disqualified.
- 8.1.5 Manipulate the fauna/flora: Immersion is disqualified or even the disqualification of the Championship if the handling is considered very serious. Additionally, before the dive, the athletes diving equipment can be inspected at any time to check that no captured specimen is being carried previously or have some kind of equipment to capture sea life. In case of detecting this kind of circumstance, the team will be disqualified from the Championship.
- 8.1.6 Manipulation of the diving computer (falsification of the immersion data carried out, remove it during the dive to not register the maximum depth or change with the buddy computer) or not present it at the exit of the dive: Disqualification of the Championship.
- 8.1.7 Losing the diving buddy more than 10 minutes: Immersion is disqualified.
- 8.1.8 Manipulating the camera out of the water or at the surface without a judge's supervision: The immersion is disqualified. It is mandatory to notify the judge to manipulate the camera for any reason.
- 8.1.9 As explained in General Rules, submerging artificial objects only allowed for Creative Category and Movie Category these objects must be declared before the dive (because of size concerns they must be declared before the travels) and at the end of the dive to the Technical Delegate.
- 8.1.10 Drones are not allowed in Cuba.
- 8.1.11 If citizens of participating country need to obtain a Cuban visa federations must provide the names and a copy of their passports to the LOC. Their visas will be issued by Cuban embassies locally.

13. NOTES OF INTEREST AND CLIMATOLOGY

Ecotour Agency will be welcoming competitors at José Martí International Airport - Havana. Competitors will be transferred to their hotels in Havana by Ecotour.

Also, Competitors will be welcomed by Ecotour at Varadero Airport for hotel transfers.

On the date of their departure from Havana to Varadero, competitors will be picked up by an Ecotour tour guide for the transfers.

The water temperature varies from 26°C to 28°C in October. We expected to have a water temperature of around 22°C/24°C. You need to bring a 1-3 mm wetsuit.

The water here is "crystal clear", with amazing visibilities to 100 meters.

14. ADDITIONAL SAFETY MEASURES

- 14.1 Every competitor as a certified diver needs to know diving skills, techniques, and safety procedures, diving with the buddy, ascent speed, and bottom times without decompression and air management.
- 14.2 Every athlete dives with a BCD, pressure and depth gauge, regulator, alternative air source, dive computer, and safety marker buoy. A marker buoy (sausage) to each competitor is obligatory.
- 14.3 During the World Championship, dives will not exceed 30 meters of depth, can not dive more than ninety minutes (including the safety stop), and will not do decompression dives.
- 14.4 If the divers lose each other underwater, they have to ascend to the surface. Only when they find each other on the surface, they can descend again. If they do not see each other, they must report this immediately to the judge on the boat or the organization.
- 14.5 Regarding COVID, everyone has to follow the local Government rules that will apply. Nevertheless, the organization will provide a specific document for the event regarding the pandemic situation at the time.

The logo for CMAS (Confédération Mondiale des Activités Subaquatiques) is displayed in a large, light blue, sans-serif font. It is centered at the bottom of the page and partially overlaps with the faint background watermark of a diver's head and mask.
